

2011 Full Line

Audi  
Truth in Engineering

substance always wins the day

It takes more than hard work, dedication and vision to create the truly exceptional. It takes something intangible. Something you can't quite put your hands on. It's courage, guts, perseverance, passion and fierceness of focus all wrapped into one.

And it's this intangible characteristic that defines all of us at Audi. It's the driving force behind

every pencil line we draw, every calculation we make and every idea we deem not good enough.

It's why every inch and curve and angle has purpose. It's why we test our cars at the highest of speeds for hours on end so they can be driven on any surface and in any condition - rain, shine or white-out blizzard.

It's why substance always wins the day. It's why cutting a corner, even a weld seam in the trunk, would be sacrilegious. And it's why for us scrutiny is so deeply ingrained it's like the very act of breathing.

This is Truth in Engineering. And this is Audi.

a badge doesn't define you  
it represents you

- Audi magnetic ride

## MODEL CONFIGURATIONS

- 4.2 FSI® 430hp V8, four valves per cylinder, with FSI® direct injection, dry sump lubrication system, aluminum cylinder block and crank case

The sportscar only Audi could make. The R8 Coupe 4.2 offers a high revving V8, producing 430hp in a mid-engine configuration. Exhilarating handling is attributable in part to the aluminum and magnesium Audi Space Frame (ASF®) and

quattro® all-wheel drive. No other vehicle in or out of its class offers the power and superior balance of excitement and refinement like the R8.

# Audi Truth in Engineering

Note: A word about this brochure. Audi of America, Inc. believes the specifications in this brochure to be correct at the time of printing. However, specifications, standard equipment, options, and colors are subject to change without notice. Some equipment may be unavailable when your vehicle is built. Please ask your dealer for advice concerning current availability of standard and optional equipment, and your dealer will verify that your vehicle will include the equipment you ordered. Vehicles in this brochure are shown with optional equipment. See your dealer for complete details on the new-vehicle limited warranty, twelve-year limited warranty against corrosion perforation, and Audi 24/7 Roadside Assistance. [Roadside assistance coverage provided by Road America in the U.S. Certain conditions apply; see your dealer for details.] Tires supplied by various manufacturers. Summer performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy or icy weather conditions. If you drive under those circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tires specified for your car or their equivalent. These summer performance tires also have a lower aspect ratio that aids performance and handling. However, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at recommended levels. Serious wheel and tire damage may occur if the vehicle is operated on rough or damaged road surfaces, or upon encountering road debris or obstacles. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices. For more information on all of these topics, please consult the owner's manual, your local dealer or call 1-800-FOR-AUDI.

Audi Navigation plus depends on signals from the worldwide Global Positioning Satellite network. The vehicle's electrical system, and existing wireless and satellite technologies, must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in street names, construction zones, traffic flow, points of interest and other road system changes are beyond the control of Audi of America, Inc. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible, therefore you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgement in determining whether or not to follow a suggested Audi Navigation plus route. Periodically, the mapping is updated, and a new DVD will be required in order to maintain the latest navigation information available to us. These will be available for purchase from time to time at an additional cost. Consult your dealer or call 1-800-FOR-AUDI for details.

Your Audi vehicle is equipped with a phone preparation utilizing Bluetooth interface to enable hands-free functionality (compatible mobile phones sold separately). You will need a Bluetooth-enabled mobile phone in order to utilize this function. Not all Bluetooth-enabled mobile phone models are compatible with Audi phone preparation. Visit [audiusa.com/bluetooth](http://audiusa.com/bluetooth), or contact your local Audi dealer for the latest listing of compatible phones. Audi recommends use of the Audi phone cradle (sold separately) with your mobile phone while operating this vehicle.
