

SIMPLY CLEVER

ŠkodaOctavia Tour

1. The Octavia Tour is one of Škoda Auto's most successful models in the company's modern history. The car has won the favour of more than one million drivers since its introduction to the market in 1996. There is no simple explanation for the Octavia Tour's enduring appeal. For some it's the car's timeless design, for others it's the outstanding ratio between price and value. Families praise the car's reliability, safety and large luggage compartment space; businesspeople treasure

the Octavia's versatility. In short, the Octavia Tour is a vehicle that is not subject to fashion trends and is able to satisfy the widest range of demands. You can also adapt the Octavia to your lifestyle and everyday needs thanks to a large offer of exceptional equipment, including sports accessories and comfort elements.

2. The roof spoiler adds a sportier style to the Combi model's elegant design (part of the sports package).

3. The 5th door spoiler is intended for the liftback version, giving the vehicle a sportier look while also highlighting its excellent aerodynamic qualities (part of the sports package).

4. The decorative exhaust tailpipe enhances the dynamic and robust appearance of the rear of the car (part of the sports package).

5. The SunSet windows, with a higher density of tint in the rear part of the Combi model,

protect the passengers and their luggage from sunshine, while also offering a higher degree of privacy. **A roof railing (lengthwise)**, standard equipment also intended exclusively for the Combi version, allows the attachment of special carriers for skis, bikes or luggage boxes.

6. Fog lamps are integrated into the main headlamps with clear optics, the design of which underpins the car's dynamics and power.

7. The front grille with its traditional vertical ribbing gives the vehicle an expression of reliability and respectability, while also clearly identifying the car as a Škoda.

8. Rear parking sensors located in the rear bumper facilitate easy parking in even tight spaces.

9. The mid-level luggage compartment floor of Combi cars offers ideal hidden storage space.

10. The front passenger airbag deactivation indicator located in the ceiling light is an exceptionally important detail if you fit a child car seat to the front passenger's seat.

The Octavia Tour is a remarkably pleasant vehicle for drivers and passengers alike. You will feel at home behind the wheel starting with the very first kilometres you drive. The simple elegance and functionality of **the instrument panel** give the impression of maximum clarity. All controls are within easy reach, and necessary information (speed, revolutions etc.) is in the driver's field of vision. Drivers who want to have additional travel information such as journey length and fuel consumption under control are in luck. We offer either **a multifunctional indicator** or a large **Maxi DOT display** capable of providing the outdoor temperature, immediate and average fuel consumption, or the selected radio station.

Safety is increased by elements such as **ABS** and **driver and passenger airbags**. A **height-adjustable driver seat** contributes to comfort behind the wheel. And those who enjoy even greater comfort and safety can choose from additional accessories:

- 1. Electrically adjustable heated external mirrors**
- 2. Electric front windows** (electric rear windows are also available)
- 3. Small leather package** (4-spoke steering wheel, gear stick knob and handbrake handle)
- 4. ESP** - Electronic Stability Programme
- 5. Symphony radio** with CD and MP3 players
- 6. Air conditioning** with mechanical regulation (Climatronic air conditioning with electronic regulation is also available)

3-spoke leather steering wheel (part of the sports package)

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses Škoda Auto's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes

(including changes of technical parameters or individual model equipment). Please consult your authorised Škoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
