

SIMPLY CLEVER

ŠkodaPraktik

“ŠkodaPraktik takes on many roles. Just like you.”

To be a successful businessman means having certain qualities. Among others, they include reliability and the ability to represent your business. It is also necessary to be powerful, tough and flexible... simply put, to be versatile. Those who want their business to do well give it everything. The same is expected of their car. Škoda Praktik is a two-seater utility vehicle offering you comfort and easy manoeuvrability as well as the looks of a passenger car. Parking is easy because of its dimensions. At the same time it is big enough for the needs of tradesmen with small or medium-sized businesses. The car will surely find a place in the fleets of larger enterprises and will excel in delivery-to-home services.

1. Sheet metal panelling of the rear windows are one of the features of the Škoda Praktik model's exterior. Their purpose is both to protect cargo from being seen from the outside or from sunshine, and they also provide a guarantee of higher safety. When compared to glass, the sheet metal covers are more rigid and when moving cargo they are less likely to be damaged when compared to glass. Plastic door panelling provides improved resistance for the rear doors.

2. The tailgate window protection grate is a handy solution when you often transport cargo that could damage the glass window. At the same time, the grid reduces the danger of the car being broken into. If the cargo space is not fully loaded, the cover grid does not hinder the driver's view through the tailgate.

3. The cargo space that you have available is much bigger than it might appear when

looking at the compact dimensions of the car; the Škoda Praktik offers 1,900 litres.

4. The lock on the inner side of the tailgate, installed in every Škoda Praktik, is used for emergency opening of the cargo space from within the car.

“Space for cargo. Comfort for the crew.”

1. and 3. The three-unit folding floor of the cargo space consists of two hinged and one fixed part. The first part of the floor (right behind the cargo edge) can be easily folded back and hung up on the ceiling, which allows you easy access to the spare tyre. The central part of the floor is fixed. Under the third part of the floor (behind the space for the driver and passenger), you will find storage spaces for minor things after folding it back (for tools, tow bar, etc.).

2. The adjustable transverse black partition wall with a grate in the upper part prevents any cargo from sliding forward and injuring the driver or passenger. The wall can be moved by up to 10 cm. This variability substantially improves comfort for those in front, mainly the driver, because it allows the position of the partition wall to be adapted to his seat.

4. The anti-slip floor surface and six fixing lugs in the cargo space ensure stability of transported cargo on winding roads.

5. The Praktik interior offers two colour variants of the dashboard: Onyx-Onyx or Onyx-Silver-grey. The driver's area was designed with respect to ergonomics. The 4-spoke steering wheel is height- and reach-adjustable in all Škoda Praktik cars and, optionally, you can order a height-adjustable driver seat or heated front seats. Power steering as well as a light and precise gear shifting is commonplace for the Škoda Praktik model, resulting in easy manoeuvring of a fully loaded car as well.

“Škoda Genuine Accessories”

1. Roof railing (LAH 770 001) is used as a base for the installation of the transverse roof rack. (LAS 620 002A)

2. Rear parking assistant will make manoeuvring with the car easier, especially when the load is obscuring the rear-view mirror. (BEA 771 001)

3. Rear bumper cover foil with a warning triangle has two functions: to protect the bumper against damage when loading

or unloading the cargo space and to warn of a stopped or parked car from a distance. (KDX 770 001)

4. Rear bumper protective cover is a handy accessory protecting the bumper against damage when handling cargo. (KDA 770 004)

5. Detachable tow bar is available from Škoda Genuine Accessories or as an optional extra. (EEA 770 001)
Tow bar electrics. (EEA 700 001 E4)

6. A net for emergency equipment is suitable for example for a first aid kit or a tow rope. (DMA 771 001)

7. and 8. The levelling floor for the cargo space levels the floor height to the loading edge height and simplifies handling of the cargo being transported. (DAA 771 001)

9. Front rubber foot mats will help you easily keep the driver's and passenger's space tidy. (DCC 770 002)

** Applies to standard equipment version; driver weight 75 kg.

*** Applies to vehicles with 14" wheels.
* Applies to versions with DPF (Diesel Particulate Filter).

General information

ŠKODA SERVICE
Put your car in good hands. We give you good reasons to choose an authorised Škoda service partner.

We offer you first-class quality
Your car requires advanced technology. For this reason, all the Škoda authorised service partners have special tools and quality diagnostic systems at their disposal that in combination with the technological procedures prescribed by the manufacturer ensure the perfect functionality and reliability of your car.

Professionally trained staff by the manufacturer
The ever-rising standard of the technology used in the car requires corresponding professional qualifications on the part of the staff. To meet this requirement, the manufacturer organises regular training for the staff of the authorised service establishments in order to provide them with state-of-the-art information important for their activities.

Our motto: be fair and open with our customers
Careful, professional and friendly counselling for the customers upon acceptance of orders is of great importance to us in the same manner as diligence and completeness with respect to repairs and maintenance work. All this is continuously monitored by internal quality control of the provided services.

Comprehensive range of services:

• **Service inspections**
For your car to remain in top condition and functional for a long time and, optionally, not to forfeit warranty, it is essential for your Škoda authorised service partner to perform regular service inspections. The service schedule informs you about when the service inspection must be done.

• **Body and paintwork service**
Damage to the body and painted areas following an accident will be fixed by your authorised Škoda service partner in an expert manner, in accordance with information from the manufacturer, using Škoda Genuine Parts. This is important not only for your safety, but also for functionality and maintaining your car's value.

• **Courtesy car**
The authorised Škoda service partner can provide you with a courtesy car for the period of repair or service inspection.

• **Pick-up and delivery service**
If you are unable to take your vehicle to a Škoda service, an authorised Škoda service partner will arrange a date with you to pick up the car. The car will be delivered back after the service work has been completed.

The listed services represent only a part of the wide range of Škoda service offers. The offer may vary from country to country. Please contact your authorised Škoda service partner for further details and information on the range and specific conditions of services they offer.

ŠKODA GENUINE ACCESSORIES
Genuine accessories make every vehicle unique, giving it its own style. The Škoda Praktik comes with very extensive standard equipment, however, some of the additional items can only be purchased as Škoda Genuine Accessories. These items include, for example, child safety seats, roof rails, mobile phone adapters and alloy wheels. The extra equipment offer also extends to mechanical security items and a whole series of items increasing the vehicle's utility value and individuality.

ŠKODA GENUINE PARTS
Škoda Genuine Parts are identical to those used during the assembly of Škoda vehicles. The vehicle manufacturer knows best which part is intended for which functionality and the required parameters it needs to meet unconditionally for the car to function properly.

Safety
Every vehicle component and part has its own purpose and some of them directly determine the safety of the car's occupants. Our care for safety is proven in, for example, body structure, airbags, safety belts and most importantly in the brake

system. The lives of the people in and around the car depend on the quality and operating efficiency of the brakes, especially under extreme conditions.

Availability
Škoda Auto offers a comprehensive range of parts and equipment items that are used in the vehicle's production, and does not merely focus on high-turnover parts. The supply of Škoda Genuine Parts is provided even after the relevant vehicle model is discontinued, and not just for the period specified by law: indispensable components for the operation of the car are supplied to the market for at least 15 years after the discontinuation, car equipment components are supplied to the market for at least 10 years after the discontinuation and components of door lining and carpets are supplied to the market for at least 8 years after the discontinuation.

Top quality
To verify quality parameters, the development department maintains an extensive testing facility including a test circuit with extreme polar and desert conditions, as well as material testing laboratories of the quality control department. Thanks to the use of first-rate materials and technologies, Škoda Genuine Parts ensure safe and carefree driving. Precise alignment guarantees replacement of worn parts without unnecessary complications.

Long life
The use of first-rate materials and production technologies in the manufacture of Škoda Genuine Parts ensure their maximum reliability and long life.

Original technical solutions
The knowledge gained in production and operation is continuously reflected in the search for new technical solutions aimed at obtaining a truly first-rate product, which will meet the customer's requirements.

Legislative requirements and certification
All Škoda Genuine Parts meet the legislative requirements and are approved by Škoda Auto on the basis of meeting stringent criteria. This way the customer obtains a guarantee that the components installed in their vehicle will be reliable, functional and safe.

Protection of the environment
The Škoda Genuine Parts range includes exchange parts whose production does not burden the environment with waste, excess heat and water pollution to a high degree. Returned parts and aggregates are not discarded but modified for re-use, thus re-utilising a great part of the work and energy invested in the parts during their manufacture.

INFORMATION ON THE INTERNET
Information is available at www.skoda-auto.com to assist you in deciding which vehicle suits your needs thanks to the detailed descriptions and photographs of all our models. Our configuration programme will let you try various combinations of standard equipment, engine, paint colour, interior and extra equipment to make sure your new vehicle accurately meets your requirements. This programme will also assist you with the calculation of optimum monthly payments for vehicle financing and the selection of a suitable dealer.

ŠKODA FINANCE
If you select a Škoda Praktik vehicle, ŠkoFIN will assist you with financing it. The ŠkoFIN company offers programmes both for individuals and legal entities. Our Škoda Finance brand product line offers both lease and loan financing. You can contact one of our authorised Škoda partners to arrange and sign an agreement and to learn more about our product offer or the convenient special offers from ŠkoFIN. These are time limited, however, they bring very unique and interesting benefits.

FLEET SALES
Whether your car fleet is small or large or whether you are a customer from the business or public sector, Škoda Auto and its authorised dealer network are here for you. We offer products and services tailored to your business and financial needs, including top-quality customer care, a portfolio of services corresponding to the specific requirements of corporate customers and a high quality of cars, accessories and maintenance services, which are a guarantee of low operating and ownership costs of your car fleet.

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses Škoda Auto's awareness of responsibility for, and attempts at, the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes

(including changes of technical parameters or individual model equipment). Please consult your authorised Škoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
