

SIMPLY CLEVER

The new Škoda Praktik

Even a small business has big ambitions. But to fulfil those ambitions, your business needs to be flexible, versatile and reliable. Just like the new Škoda Praktik. It's a 2-seater utility vehicle that offers the comfort and agility of a passenger car. At the same time, it's big enough to meet all the delivery needs of your business. And thanks to its stylish design, business can finally be pleasure.

The **Škoda Praktik**, the new utility car, effortlessly moves through the city traffic. Due to its manoeuvrability and dimensions, you will easily park it, and thanks to the new economy engines offered, you can also look forward to its economical running cost. The Škoda Praktik will prove successful wherever the transportation of smaller loads is concerned, for example in home delivery services, as well as in fleets of larger companies.

Behind the compact vehicle exterior lies an extraordinarily spacious interior for both the load and two-person crew of the vehicle.

The 1,900-litre cargo space is easily accessible from three sides: through the wide and high side doors and the large rear-hinged fifth door.

In the driver and passenger's space, which is safely separated by a sliding partition wall with a grate in its upper section, the vehicle crew will feel as comfortable as in a passenger car. As standard, the vehicle is provided with front airbags, and to improve safety, you may also have your car equipped with electronic systems, such as ESP (Electronic Stability Programme) etc.

The **sheet metal panelling** of the rear side doors protects the cargo from sunshine and from being seen from the outside. When compared with glass, the sheet metal covers are more resistant and, when moving cargo, they are less likely to be damaged than glass.

The tailgate glass can be protected against any damage by a **protection grate**, which also reduces the danger of the car being broken into.

In the new Škoda Praktik utility car, a highly accessible **storage space is available** with a maximum volume of **1,900 litres**.

The **folding floor** of the cargo space consists of one fixed and two hinged parts. The first part of the floor (right behind the loading edge) and the third part (behind the driver and passenger's space) can be folded. The central part of the floor is fixed.

Under the third part of the floor (behind the driver and passenger's space), you will find practical **storage spaces** for tools, tow bar etc.

The **lock** on the inner side of the tailgate is designed for an emergency opening of the cargo space from the vehicle interior.

The **anti-slip floor surface** with six fixing lugs reliably ensures stability of transported cargo.

The **adjustable transverse partition wall**, which separates the cargo space from the crew space, can be moved by up to 10 cm. A shorter driver, setting his or her seat more forward, may slide the wall forward to utilise the maximum size of the cargo space. On the contrary, a driver who needs more space may slide the partition wall, as well as his or her seat, deeper towards the storage space.

The **dashboard**, designed in Onyx/Onyx (see photo) or Onyx/Silvergrey, includes a logical and transparent layout. The instruments are excellently laid out and visible, and the controllers are easily reachable. The newly offered equipment of the Škoda Praktik car model includes the Swing radio with a CD and MP3 player.

General information

ŠKODA SERVICE

Put your car in good hands. We give you good reasons to choose an authorised Škoda service partner.

We offer you first-class quality

Your car requires advanced technology. For this reason, all the Škoda authorised service partners have special tools and quality diagnostic systems at their disposal which in combination with the technological procedures prescribed by the manufacturer ensure the perfect functionality and reliability of your car.

Professionally trained staff by the manufacturer

The ever-rising standard of the technology used in the car requires corresponding professional qualifications on the part of the staff. To meet this requirement, the manufacturer organises regular training for the staff of the authorised service partners in order to provide them with up-to-date information important for their activities.

Our motto: be fair and open with our customers

Careful, professional and friendly counselling for the customers upon acceptance of orders is of great importance to us in the same manner as diligence and completeness with respect to repairs and maintenance work. All this is continuously monitored by internal quality control of the provided services.

Comprehensive range of services:

- **Service inspections**
For your car to remain in top condition and functional for a long time and, optionally, not to forfeit warranty, it is essential for your Škoda authorised service partner to perform regular service inspections. The service schedule informs you when the service inspection must be done.
- **Body and paintwork service**
Damage to the body and painted areas following an accident will be fixed by your authorised Škoda service partner in an expert manner, in accordance with information from the manufacturer, using Škoda genuine parts. This is important not only for your safety, but also for functionality and maintaining your car's value.
- **Courtesy car**
The authorised Škoda service partner can provide you with a courtesy car for the period of repair or service inspection.
- **Pick-up and delivery service**
If you are unable to take your vehicle to a Škoda service, an authorised Škoda service partner will arrange a date with you to pick up the car. The car will be delivered back after the service work has been completed.

The listed services represent only a part of the wide range of Škoda service offers, which may vary from country to country. Please contact your authorised Škoda service partner for further details and information on the range and specific conditions of services they offer.

ŠKODA GENUINE ACCESSORIES

Škoda Genuine Accessories offer you child safety seats, roof rails, alloy wheels, sunblinds and more. For more detailed information on the complete Škoda Genuine Accessories range see the individual Škoda model catalogues.

ŠKODA GENUINE PARTS

Safety

Škoda genuine parts are identical to those used during the assembly of Škoda vehicles. The use of first-class materials and technologies guarantees safe and worry-free driving.

Availability

Škoda Auto offers a comprehensive range of parts and equipment items that are used in the vehicle's batch production and does not merely focus on high-turnover parts. Škoda ensures the provision of genuine parts even after the relevant model is discontinued.

Long service life

The use of first-rate materials and production technologies in the manufacture of Škoda genuine parts ensure their maximum reliability and long life.

Environment protection

The Škoda Genuine Parts range includes exchange parts whose production has a low environmental impact in terms of waste, excess heat and water pollution.

INFORMATION ON THE INTERNET

Information is available at www.skoda-auto.com to assist you in deciding which vehicle suits your needs, thanks to the detailed descriptions and photographs of all our models.

ŠKODA FINANCE

ŠkoFIN offers solutions for both individuals and businesses. You can learn about the current offer through any authorised Škoda partner. The credit or lease contract can also be concluded online directly with the car dealer.

GLOBAL FLEET

The Škoda Auto Global Fleet Services offer B2B fleet solutions to customers with all kinds of requirements. A fleet made up of Škoda cars offers unmatched roominess, long-lasting quality, safety, low total costs of ownership and, as a result, excellent value for money. You can find more information about our products and services at www.skoda-auto.com/fleet.

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses Škoda Auto's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes (including changes of technical parameters or individual model equipment). Please consult your authorised Škoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
